ARA2508ST2 (battery & charger included)

THE MINI TRUCK WITH A MONSTER SIZED CHIP ON ITS SHOULDER

Half the size. Double the attitude. All KRATON.

The 1/16 scale ARRMA MINI KRATON 3S BLX 4X4 arrives with raw ambition and zero fear, built to prove smaller can still send shockwaves across any bash spot.

MINI is a brand-new ARRMA platform that delivers big-scale speed, durability, and aggressive bashing performance in a compact size, bridging the gap between GROM and 1/10 vehicles. It doesn't just look like a scaled-down basher, it captures how larger scale ARRMA vehicles accelerate, launch, land, and perform.

Its compact footprint hides a full arsenal of ARRMA strength. Reinforced components and heavy-duty bumpers deliver durability that lets you go wild without thinking twice. The aggressive body features bold factory paint with a quick release clipless system.

The MINI KRATON 3S BLX is the first ARRMA vehicle equipped with PowerGuard. Out of the box on 3S, it runs at 2S-style speeds and delivers 50 percent more runtime. Perfect for dialing in your skills. When your confidence rises, plug in the PowerKey and unleash full 3S muscle that turns this powerhouse into pure KRATON chaos.

Inside sits a Spektrum brushless system tuned for maximum fun per square inch. The MINI KRATON launches hard, soaks up punishment, and stays planted across any terrain. Waterproof electronics keep the fun rolling through puddles and mud. The Spektrum SLT transmitter features throttle limiting and 4 selectable steering correction modes.

This isn't just the little brother. This is the next KRATON chapter and it's hungry for your trigger finger.
