Timber® 1.5m 10th Anniversary Special Edition BNF Basic

PRICE

STOL and Sport Airplane for Intermediate to Experienced Pilots

CLASSIC LOOK. MODERN FEATURES. HAPPY 10TH ANNIVERSARY!

The E-flite® Timber® 1.5m 10th Anniversary Special Edition celebrates one of the most admired RC aircraft of all time! This special edition includes all the popular features: shock-absorbing landing gear with oversized tundra wheels, optional float set, leading edge slats, functional slotted flaps, and LED lighting system with landing, navigation, and strobe lights. The new Timber is enhanced with a powerful 3S/4S compatible power system, stiffer wing construction, and the iconic short-nose classic design. New improvements include a top-mounted hatch for faster battery changes, combined wing connectors for easier installation, and strengthened landing gear mounts with heavy-duty springs for improved durability and STOL capability on rough terrain. It features metal-geared servos, a high-capacity 70-amp Spektrum Avian Smart Lite ESC, and factory-installed AR631+ receiver with AS3X+ and SAFE Select technologies. The hollow-core EPO construction with composite reinforcement delivers lightweight strength perfect for aerobatics while maintaining low wing loading for exceptional STOL and slow-flight performance. It all adds up to why the Timber 1.5m remains the best "next step," everyday sport, and STOL-capable model for a wide range of pilots — only now it's better than ever in this Anniversary Special Edition!

EASIER TO FLY

WITH AS3X+® AND SAFE® SELECT TECHNOLOGIES
