

KEY SELLING POINTS

- **Durable, Molded Hull:** One piece molded composite construction provides great strength and is much more impact resistant than fiberglass.
- **Removable Retrieval Arms:** Turn the boat from a scale troller into a usable retrieval boat with ease. The naturally floating design makes it a breeze to retrieve boats up to 48 inches in length.
- **Scale Detail:** Scale detail provides as much realism as possible including tires, winch, crane, among other scale accessories on the deck finish out the details.
- **Optional Operating Pump:** Working water cannons plumbed and ready to accept a water pump will add to the ultimate realism. The pump will operate on a 3rd channel which allows you to turn on and off the water cannons with a push of a button. (PRB380001 - Water Canon Pump: Tug 30)
- **60-amp ESC:** Able to handle more power than needed for a boat this size. Selectable between LiPo and NiMh chemistry. 2s - 3s compatible.
- **High Torque Servo:** Waterproof high torque servo will provide all the necessary power to steer a 48-inch boat back to shore and the metal gears keep the gears from stripping.
- **2.4GHz 4 Channel Transmitter:** Not only does this transmitter provide interference free connection, but you can turn the LED lights on/off via a button and control the optional water cannon...right from the transmitter.
- **Boat Stand:** Works as display or work stand, and wood construction can be stained to match your décor.
- **700 Size Water Cooled Motor:** Powerful brushed motor provides more than enough torque to move large 48-inch gas powered boats. Large cooling heatsink provides plenty of cooling.
- **Scale LED Lighting:** Navigation lights and mast lighting provides that scale look and are easily seen from far away.
- **Pre-Installed Ballast:** Allows you to have a perfectly balanced boat right out of the box.
