TRAXXAS®

NISSAN
240SX

PRECISE DRIFTING - POWERED BY TSM®

- Rear-wheel-drive, 200mm platform with high-angle steering
- Advanced TSM Drift technology replaces old-fashioned drift gyros
- Specialized knowledge or skill is not required to get in on the action
- TSM Drift tuning in the Traxxas Link app
- TQi Wireless Module included!

TQi™ with Wireless Module

Three Customizable Drift Modes

Electronic Handbrake

NEW HIGH-ANGLE STEERING KIT INCLUDED

An optional High-Angle Steering Kit is included to increase the steering angle to 75° for customers who prefer more aggressive steering. The kit is also available separately and is quick and easy to install with the included instructions.

High Angle Steering Kit: 10524
Compatible with Ford Mustang and Nissan 240SX

- Refined performance and innovative tuning options for expert enthusiasts
- The ultimate in modern, smooth, drifting action

REAR WHEEL DRIVE

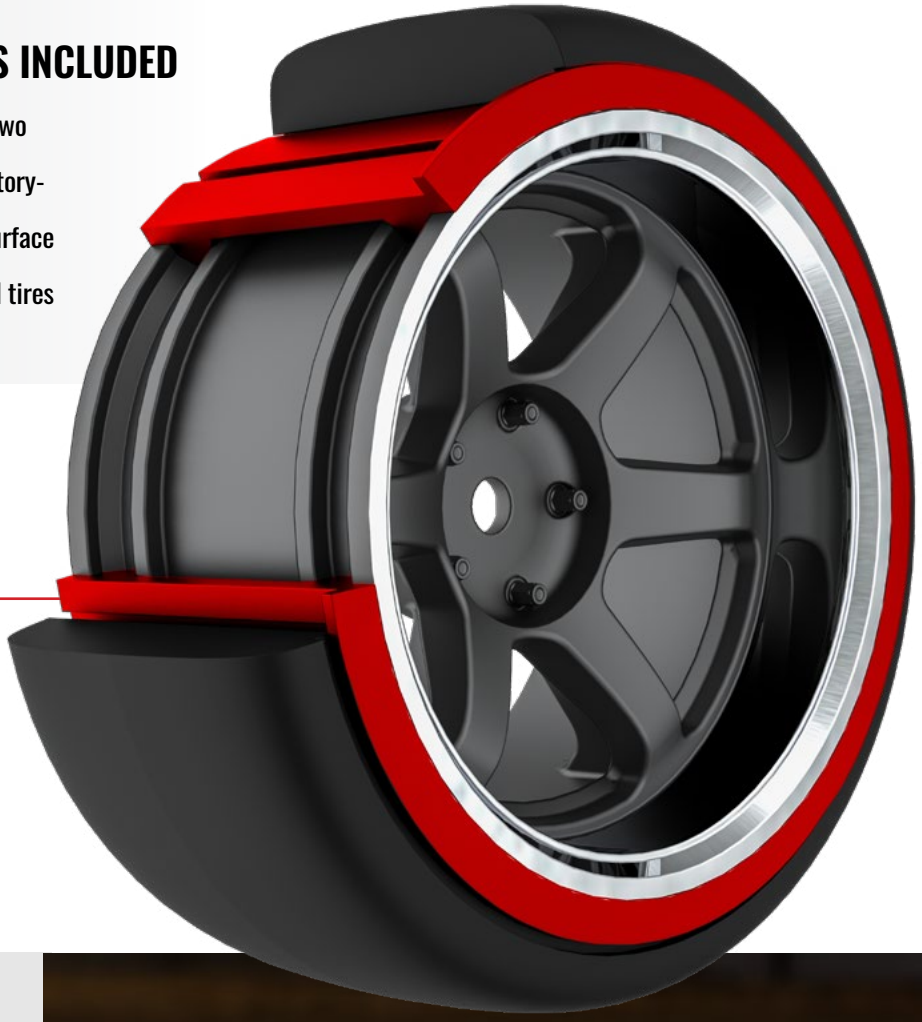
Hard & Soft Compound Tires

Adjustable Tuned Suspension

Rear Spool with 48-Pitch Gears

HARD AND SOFT COMPOUND TIRES INCLUDED

4-Tec Drift is designed for maximum versatility with two sets of 1.9" drift tires included in the box. Use the factory-installed hard compound tires on any hard abrasive surface like pavement or cement. The included soft compound tires improve drift control on polished track surfaces.



Stylish 6-spoke wheels feature a rubber inner liner to hold the tire in place. Tires swaps are quick and easy thanks to this innovative feature.

Assembled Tires & Wheels:

10574 - Hard Compound (front)
10575 - Hard Compound (rear)
10576 - Soft Compound (front)
10577 - Soft Compound (rear)

HARD COMPOUND TIRES *(INSTALLED)*

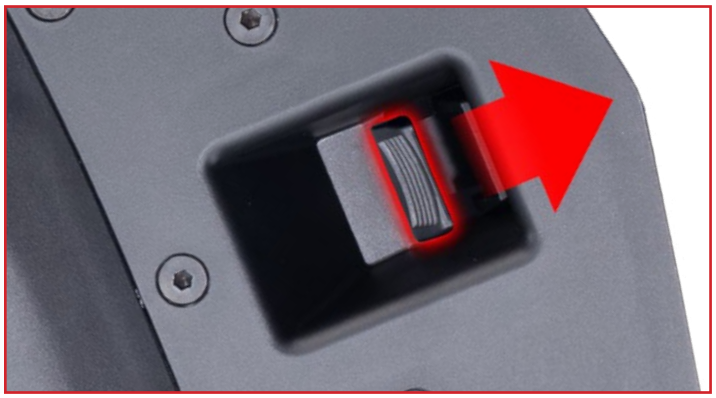
4-Tec Drift comes out of the box with hard-compound tires designed for long life on rough, abrasive surfaces. The tires are molded with a single dot on the inner sidewall.

SOFT COMPOUND TIRES *(INCLUDED)*

The included soft-compound track tires are designed for use on smooth surfaces such as polished concrete or dedicated drift tracks. The tires are molded with two dots on the inner sidewall.

CLIPLESS 240SX BODY

4-Tec Drift raises the bar for durability, ease of use, and scale detail with an all-new clipless Nissan 240SX body. Beautiful high-gloss paint contrasts the molded body details for show-stopping looks and classic 240SX styling.



Hidden body mounts under the hood and rear spoiler preserve the 240SX's sleek lines while holding the body tightly to the chassis.

Assembled Bodies: 10515-RED 10515-BLK

The Nissan 240SX body is superbly detailed with injection-molded side mirrors, rear spoiler, lower grille, and splitter.

COMPATIBLE WITH ADJUSTABLE BODY MOUNTS

Convert 4-Tec Drift to use 200mm on-road bodies

Adjustable Body Mount Conversion Kit (Part 10518)

- Includes front and rear adjustable body mounts
- Front foam bumper
- Installation hardware

8386 - Corvette C7 Body

8391 - Cadillac CTS-V Body

TQi WITH ELECTRONIC HANDBRAKE

When it's time to initiate a drift, tap the handbrake and the rear wheels lock momentarily to break traction and begin the rotation.

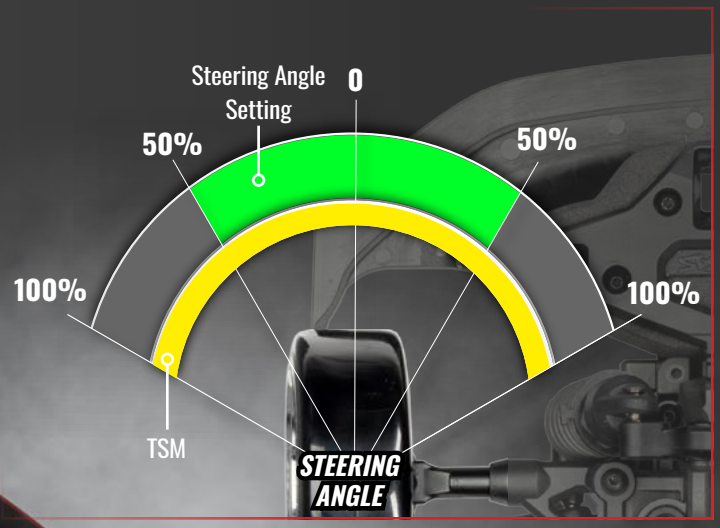
HOW IT WORKS: TSM Drift - *Powered by Traxxas Stability Management*

Innovative TSM technology makes it easier to drift and have immediate success. TSM offers three drift modes: TSM Drift, TSM, and Gyro.

The default settings are tuned for most drivers and surfaces, making it easy to get started. **TSM Drift Mode** activates when you begin a drift, automatically countersteering and adjusting throttle to hold the drift angle. Avoid changing settings until you're familiar with the car. As your skill increases, **TSM Mode** offers advanced tuning for different surfaces and driving styles.

Steering Angle

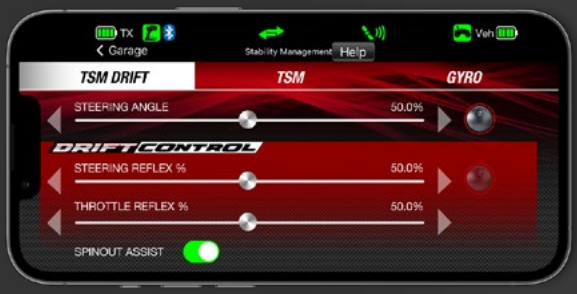
- Controls how much steering angle the driver can input
- Default setting: 50% (adjustable with Multi-Function knob)
- 50% limit helps beginners avoid overturning and losing control
- Steering angle can be adjusted in the Traxxas Link app or with the Multi-Function knob



TRAXXAS LINK WIRELESS MODULE

A Traxxas Link™ Wireless Module comes standard to harness the full potential of TSM's powerful electronic drift modes. Use the full-color graphical interface to personalize the settings and unlock advanced tuning features.

TRAXXAS LINK APP CONTROLS



TSM Drift Mode

Steering Reflex

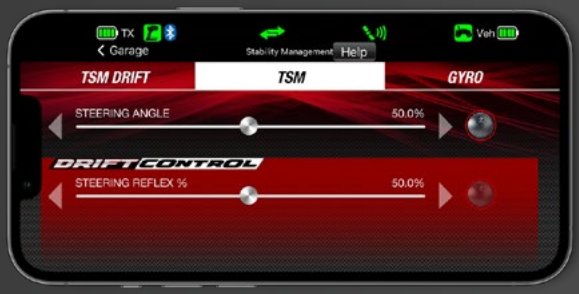
- Works like standard TSM control on other Traxxas models
- Controls how much TSM assist is applied to maintain drift angle
- Output is tuned specifically for drifting and high steering angles

Throttle Reflex

- Controls TSM throttle assist to maintain drift angle
- Lower % = less throttle assist
- Higher % = more throttle assist

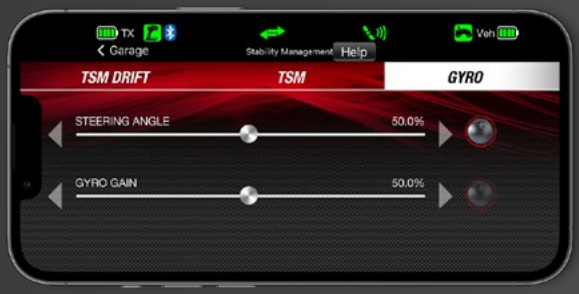
Spinout Assist

- Detects when the car is about to spin out
- Automatically applies TSM to adjust throttle and prevent loss of control



TSM Mode

- Same as TSM Drift but without throttle assistance
- Designed for advanced drivers who want full, unassisted throttle control



Gyro Mode

- Gyro Mode mimics an old-fashioned drift gyro
- Does not use advanced TSM smoothing algorithms
- Slider adjusts the Gyro gain

4TEC DRIFT

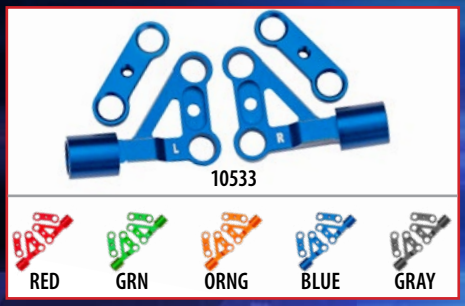
NISSAN 240SX

NEW 4-TEC DRIFT PARTS

10515	Body, Nissan® 240SX (clear, trimmed, requires painting)/ decal sheet (includes side mirrors, spoiler, grilles, hardware, & clipless mounting)	
10515-BLK	Body, Nissan® 240SX, complete (black) (painted, decals applied) (includes side mirrors, spoiler, grilles, & clipless mounting)	
10515-RED	Body, Nissan® 240SX, complete (red) (painted, decals applied) (includes side mirrors, spoiler, grilles, & clipless mounting)	
10519	Mirrors, side, black (left & right)/ mirror retainers (2)/ spoiler, black/ bumper inserts (left & right)/ 3x10mm BCS (8)/ 2.5x10mm BCS (2) (fits #10515 body)	

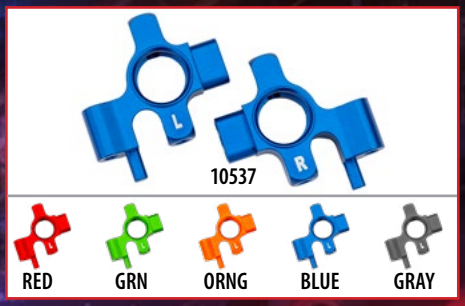
10522	Body mount, rear/ 3x8mm FCS (1) (for clipless body mounting) (fits #10515 body)	
10523	Latch, body mount, front (for clipless body mounting) (fits #10515 body)	
10524	Steering conversion kit, high angle (includes replacement servo horn, steering blocks, & wheel hubs)	
10532	Splitter, front	

4-TEC DRIFT ACCESSORIES

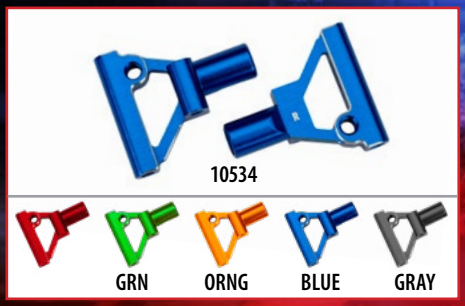


Front Upper Suspension Arms, 6061-T6 aluminum (Left & Right), five available colors

Front Shock Tower, 6061-T6 aluminum, five available colors

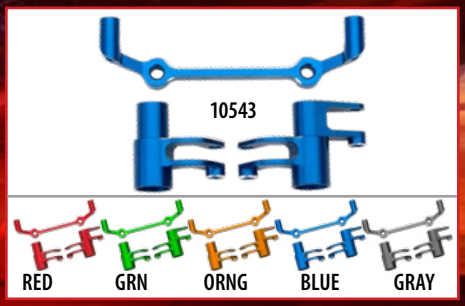


Steering Blocks, 6061-T6 aluminum (Left & Right), five available colors



Front Lower Suspension Arms, 6061-T6 aluminum (Left & Right), five available colors

Rear Shock Tower, 6061-T6 aluminum, five available colors



Steering Bellcranks & Drag Link, 6061-T6 aluminum, five available colors

Stub Axle Carriers, 6061-T6 aluminum (Left & Right), five available colors

Front Chassis Brace, 6061-T6 aluminum, five available colors

Battery Hold-Down, 6061-T6 aluminum, five available colors
